### TRADERS [if applicable]

By Trader we mean a company buying certified materials or goods and selling them without performing any transformation in-house or subcontracted.

<b>Does your company take physical possession of European Flax™ certified materials/goods?</b>	<input type="text"/>
--	----------------------

### SUBCONTRACTORS

Using a subcontractor means outsourcing a work on European Flax™ certified materials. Purchase and sale of certified products are managed by the contracting organisation, not the subcontractor. The material remains the property of the contracting organisation. Invoicing between the subcontractor and the contracting organisation is only related to the outsourced activities.

In European Flax™, companies that have common ownership with yours cannot be your subcontractors unless they are certified themselves. They can become European Flax™ certified on their own, or as part of a multisite certificate, in which case they must be added to the list of your in-house sites (section above).  
 NB: By common ownership, we mean an ownership structure where one of the organisations holds a stake of more than 51% in the other organisation.

<b>Do you subcontract certain processing activities for the Flax-Linen products you want to certify as European Flax™?</b>	<input type="text"/>
<b>Do the subcontractors processing your Flax-Linen products have a common ownership link with your company?</b>	<input type="text"/>

### SUBCONTRACTORS SITES

Please list all the subcontractors you wish to work with on your European Flax™ certified products. The certified contracting organisation is the subcontractor's guarantor and must therefore have a contract with their subcontractor, carry out internal audits of their subcontractors yearly and provide audit reports for verification by Bureau Veritas. Some subcontractors may be audited by Bureau Veritas depending on the level of risk of fibre blending related to their activities.
